# Case Studies focused on Four Policy Realms

- **Academic Freedom and Civil Liberties** – How and to what degree are national governments restricting or influencing freedom of speech and teaching and learning within universities?
- **Institutional Autonomy and University Governance** – To what degree are governments seeking controls and steering of universities, and influencing their management capacity to meet government political needs?
- **Talent Mobility and Immigration** – What national policies are emerging and influencing the in-flow and out-flow of academic and student talent?
- **Universities and International Engagement** – How do nationalistic government priorities shape and possibly restrict the ability of universities to engage with the international community?

# Case Studies

**US and Trump** – anti-immigrant, changes in visa policies (DACA), anti-science, de-regulation of environmental laws, proposed cuts in student financial aid and research, rhetoric around free speech and universities as anti-conservative

**The UK and Brexit** – current and prospective impact on international students and non-UK academics, research funding

**Hong Kong** – long shadow of Xi's China, suppression of academic freedom, Party control of university governance, students leaders in the umbrella movement and recent protests

**Brazil and Jair Bolsonaro** - campaigned on cracking down on academic freedom and curtailing the “leftist proselytizing” at universities; Police used for office raids of leftist academics

# Case Studies

**Hungary and Viktor Orbán** - battle with Central European University and restructuring of the Academic of Science

**Turkey and Erdoğan** - 8,500 faculty and 1,350 staff members at universities in Turkey have been fired; 553 arrested or named in warrants, branded as “terrorists” and “coup plotters”, travel bans for academics

**Russia and Putin** – increasing crack-down on opposition and pressure on academics not to voice dissent

**China and Xi Jinping** – firing and arresting academics - Document No. 9 in 2012 Seven Unmentionables: “Western constitutional democracy,” human rights, media independence, civil participation, pro-market liberalism and “nihilist” criticism of the party’s past. Persecution of Ugher population

**EU Neo-Nationalism** – academic and professional talent fleeing illiberal democracies

# Concepts of Nationalism

**Building the Modern Post-Feudal Nation-State** - Ernest Gellner - nationalism as an organizational and “sociological pathway to a more urban, more industrial world in need of a more formal role for government in the promotion and regulation of economic development.”

**Racial, Language, Cultural Identity** - John A. Armstrong - *Nations Before Nationalism* published in 1982, focused on human identity, and argued that "groups tend to define themselves not by reference to their own characteristics but by exclusion, that is, by comparison to 'strangers.'"

# Concepts of Nationalism

- **Building the Modern Nation-State provides an Organizational Identity**
- **Racial, Language, Cultural Identity**
- **Economic and Geographic Identities**
- **Political Identity – allows for multiracial nation-states and authoritarian states**

Nationalism unto itself is not a pejorative term. But in terms of 20<sup>th</sup> century+ world politics, it has tended to equate with populist extremist movements and **demagogues** on both the left and the right.

# Old Versus Neo-Nationalist Movements

What distinguishes Neo-Nationalism from earlier forms of nationalism?

# Old Versus Neo-Nationalist Movements

What distinguishes Neo-Nationalism from earlier forms of nationalism?

While the characteristic of Neo-Nationalism (sometimes also called New Nationalism) are similar to historical forms of the same,

- Xenophobia
- Economic Change and Status Anxiety
- Demagogues

the circumstances are different

# Old Versus Neo-Nationalist Movements

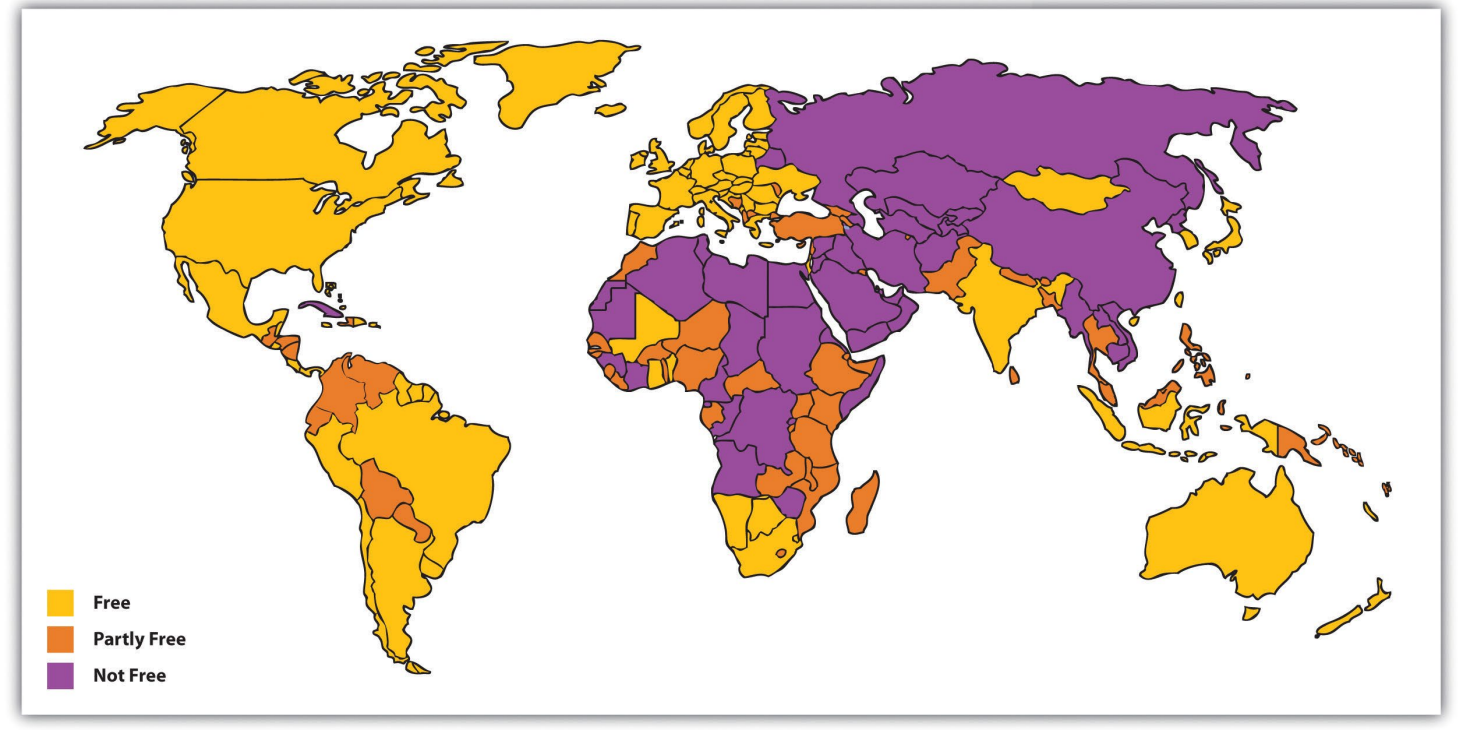

The leading sources of today's breed of nationalism:

- the post-modern pace of globalization and technological change, leading to economic uncertainty for some
- and the pace of immigration and demographic changes among and within many countries leading to status anxiety and concern for “nationalist” values

# Old Versus Neo-Nationalist Movements

Nationalism is also a tool for solidifying power exemplified in the growth in the number of so-called **Illiberal Democracies**: the emergence of nation-states with **populist leaders** and governments that increasingly limit civil liberties, justify their power initially through elections whether free or rigged, and usually drawing political support thru nativist rhetoric and policies

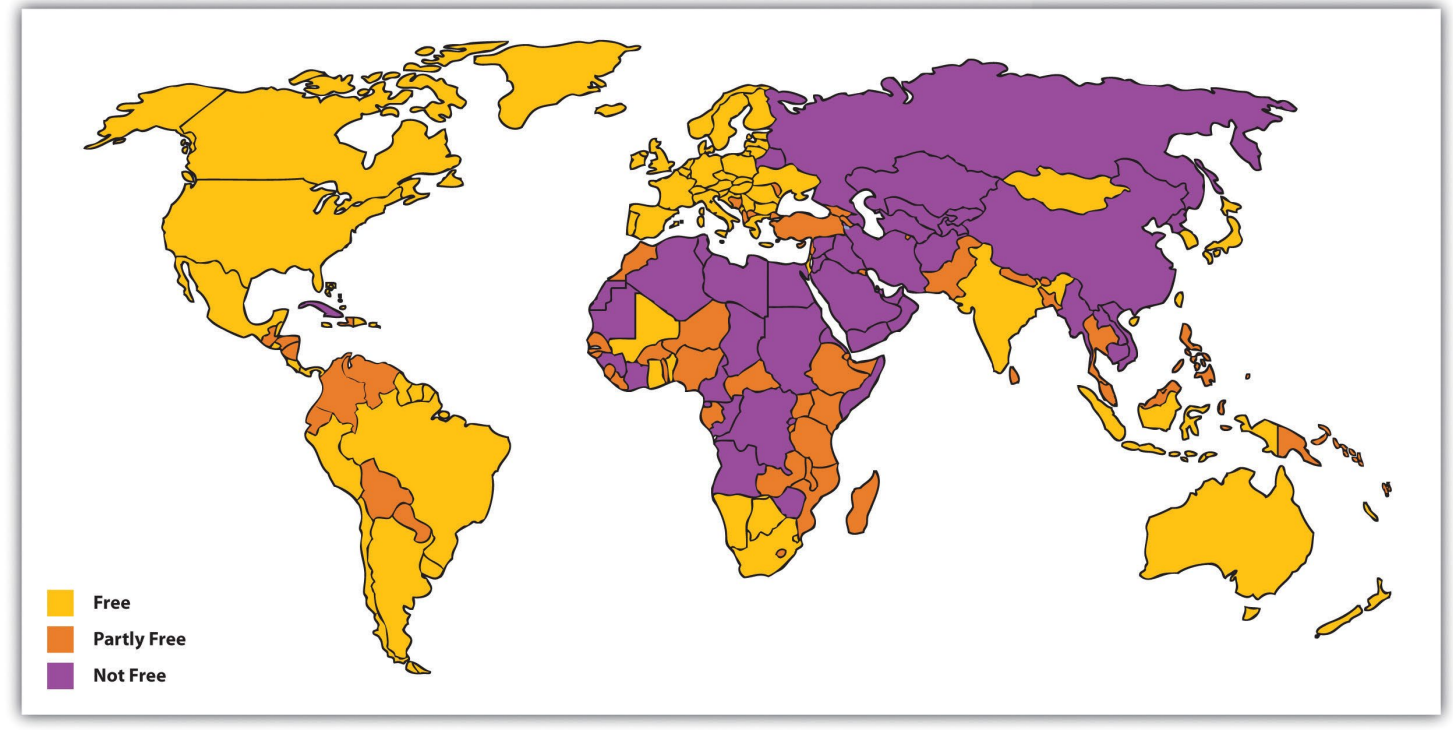

# Neo-Nationalism

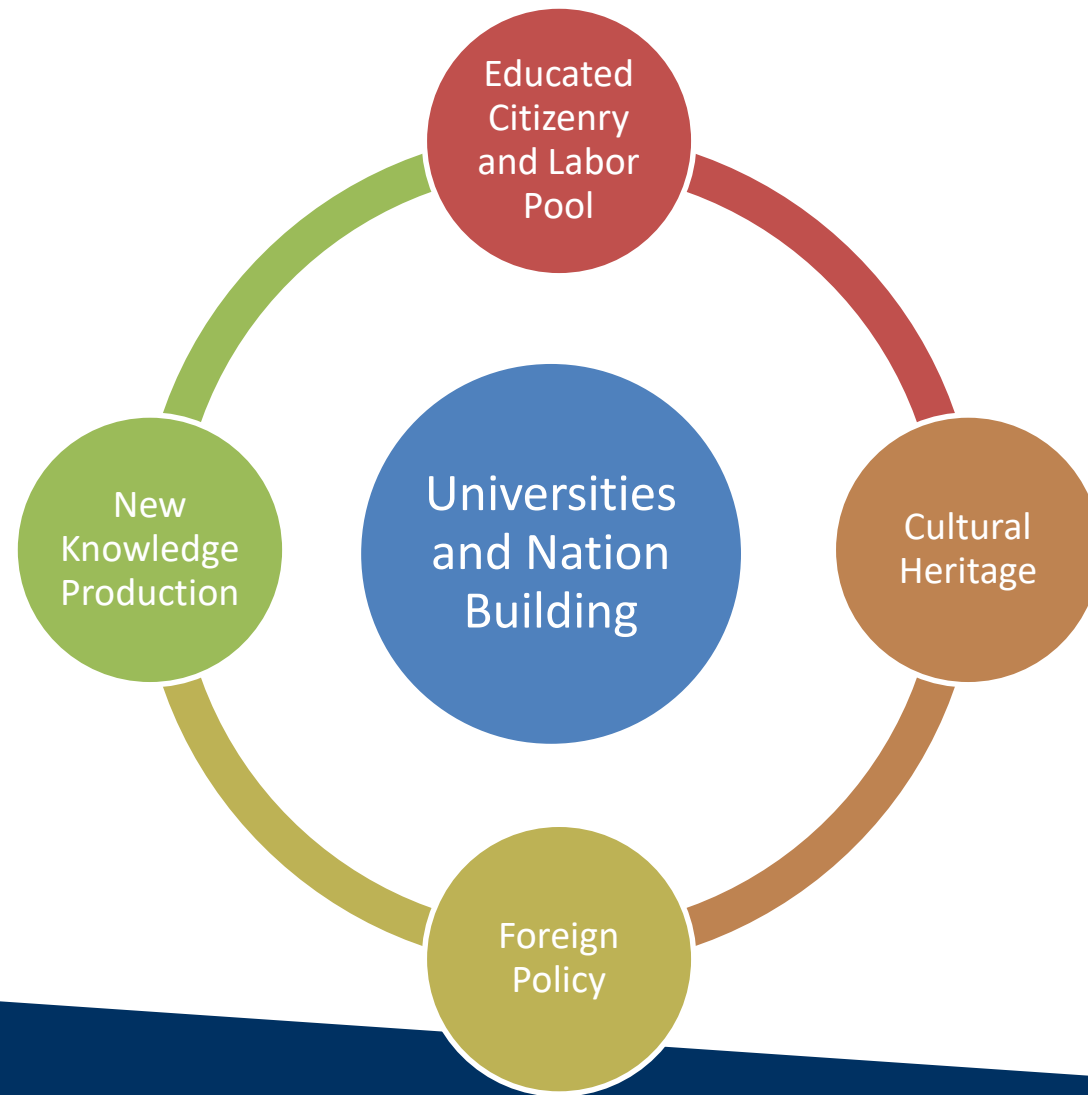

The push and pull of Globalism!

But in virtually all cases, **universities are subordinate to and usually a participant in the national political ecosystem**; they are rarely outside of it (with exceptions as transitory institutions), even if many retain the concept of the ivory tower and significant autonomy

Geography still matters!

**Germany** - Friedrich Wilhelm University of Berlin

**France** - École Polytechnique's motto: *Pour la Patrie, les Sciences et la Gloire* (For the Nation, science and glory)

*Of all our institutions, public education is the most important. Everything depends on it, the present and the future. It is essential that the morals and political ideas of the generation which is now growing up should no longer be dependent upon the news of the day or the circumstances of the moment. Above all we must secure unity: we must be able to cast a whole generation in the same mold.*

- Emperor Napoléon, Before the Council of State 1807

**United States** - Land-Grant University Movement 1862 >

*Knowledge is in every country the surest basis for happiness. Whether this desirable object will be best promoted by affording aids to seminaries of learning already established, or by the institution of a national university, or by any other expedients, will be well worthy of a place in the deliberations of the Legislature.*

- George Washington, message to Congress January 8, 1790

## A Spectrum of Neo-Nationalism – A Conceptual Window

Neo-Nationalist environment in which universities are operating, ranging from various forms of *populism* as ***political movements***, to the formation of ***illiberal democracies***, and finally nationalism as a vehicle for retaining and enhancing ***authoritarian power*** – or what could be termed state led nationalism.

# Universities as Leaders or Followers or Intermediaries

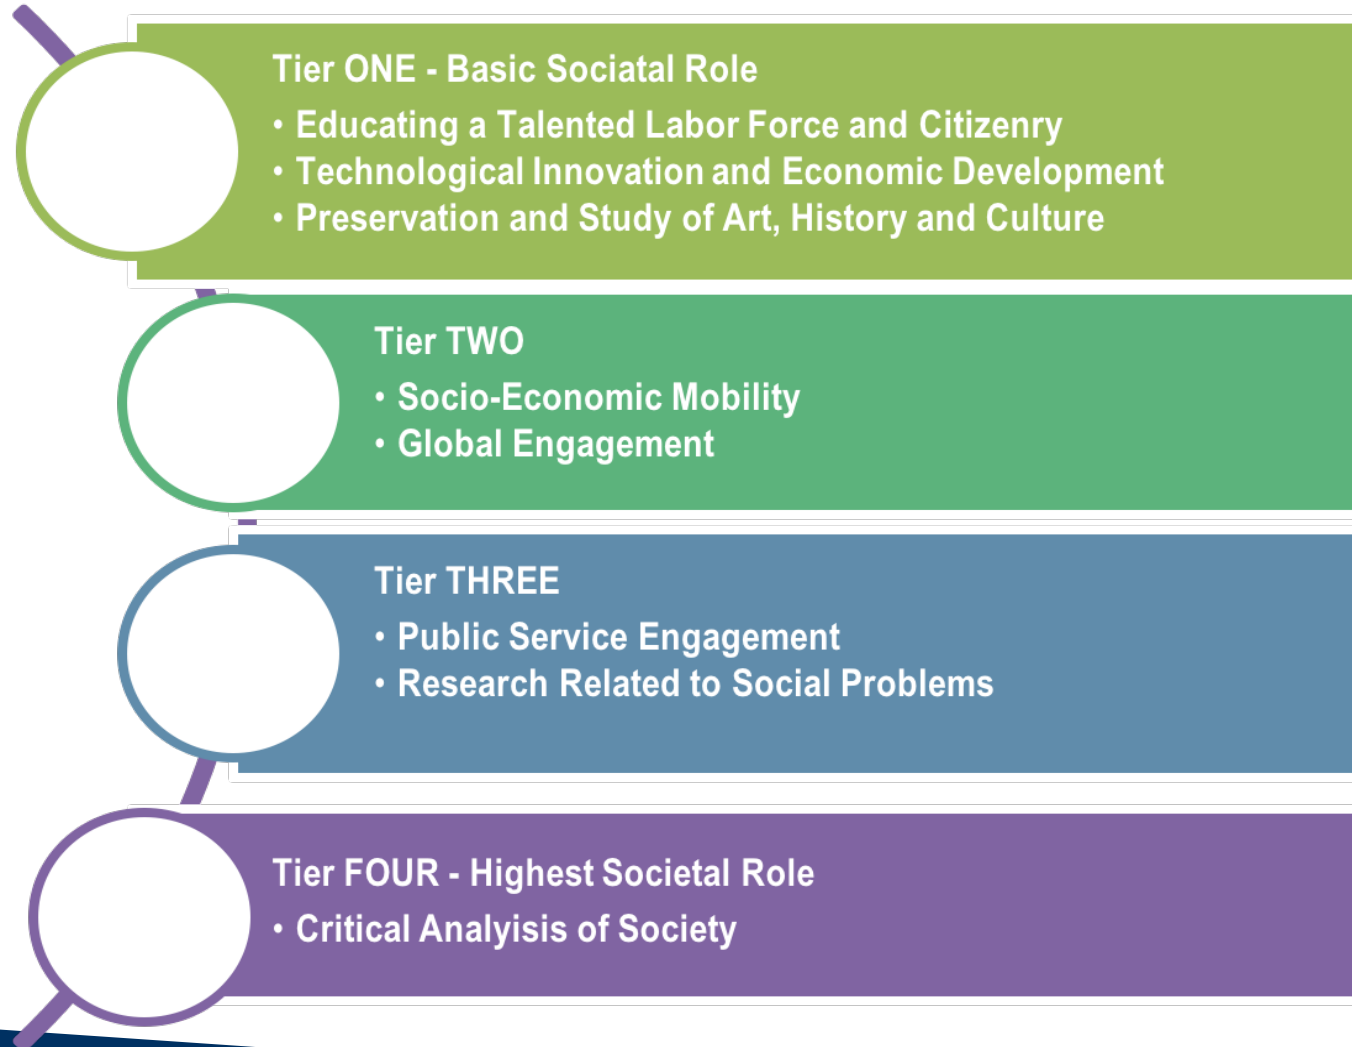

**Are universities leaders or followers, or intermediators in China? In Russia?**

**How about in South Africa and Brazil and in Chile? Or in Trump's America?**

**Any careful consideration of these complicated questions requires reflection on the historical role of universities in nation-building – political geography still matters.**
